

SUMMARY

Four years at VFA building product frontends with React, Vue, Next and Nuxt — most of it spent on the hard parts: canvas editors, complex state, and interaction that has to feel instant. Comfortable across the stack when the product needs it.

EXPERIENCE

Frontend Developer

2022 — Present

VFA · HO CHI MINH CITY

- Built the Konva.js canvas layer of AnymateMe, a presentation-to-video editor — reproducing slide geometry, z-order and text boxes faithfully while staying responsive with hundreds of objects on screen.
- Worked on the PPTX parsing pipeline in Python and Java, mapping deeply nested XML onto the editor's scene graph.
- Owned most of the Vietop learning-platform frontend — course surfaces, lesson flows and the shared component layer — keeping the Next.js / NestJS contract coherent.
- Delivered five product surfaces for a Japanese partner on Vue and NestJS, held together by one set of component conventions.
- Started on interfaces, then grew into backend and full-stack work as the products needed it.

SELECTED PROJECTS

AnymateMe

Presentation-to-video editor

A Canva-style editor that ingests PowerPoint files, turns them into an editable canvas, and exports video narrated by an AI avatar.

React · Konva.js · TypeScript · Python · Java

Vietop

Online English learning platform

A learning platform for students and teachers: course surfaces, lesson flows and the shared component layer.

Next.js · NestJS · TypeScript

ConnectJP

Partner engagement — five product surfaces

Five products for a Japanese partner: StopAccount, Robo Advisor, ChangeBank, K_ID and IDModel — each with its own domain and deadline.

Vue.js · NestJS

SKILLS

Frontend Engineering CORE — DAILY

React · Next.js · Vue · Nuxt · TypeScript · JavaScript · Modern CSS

Interactive & Canvas SPECIALISM

Konva.js · Canvas 2D · animation · interaction state

Backend WORKING KNOWLEDGE

Node.js · NestJS · GraphQL

Automation & Tooling WORKING KNOWLEDGE

Python · Git

AI-assisted Engineering PART OF THE WORKFLOW

OpenAI Codex · Claude Code

Also: Tailwind · Redux · Apollo · HTML · CSS · AWS (Learning)

EDUCATION

B.Eng, Software Engineering

HUTECH UNIVERSITY · HO CHI MINH CITY

2018 — 2022
